Spectroscopy 2

Session | Location:

10:30 – 11:00 High resolution single molecule spectroscopy in a cryogenic ion trap

Speaker
David Patterson

11:00 – 11:30
Cavity-Enhanced Dispersive Interaction of Cold Atoms with an Optical Frequency Comb

Speaker
Ticijana Ban

11:30 – 12:00
Spatio-temporal tailored attosecond light pulses for exploring ultrafast localized phenomena

Speaker
Carlos Hernandez-Garcia

12:00 – 12:20 Coherent nonlinear four X-ray photon interaction with core-shell electrons

Speaker
Ana Sofia Morillo Candas

12:20 – 12:40
Measurement of Single Photon Photoelectron Elliptical Dichroism of Electrosprayed Anions

Speaker
Mr Jon H. Both

12:40 PM
